

During the two weeks of English bootcamp I learned a lot, we did a little grammar everyday and applied these notions in a game called Kahoot game and the auction game , so that we could earn points in order to climb the podium and win a lot of points.

In the first week we worked in a group to make project, we planned to create a fictional company called BabaHome. My team composed of Remi, Ryan and Pierre, the goals of this company was to sell kitchen utensils and household appliances. This project went very well and we were able to speak in English, so we made a video to explain this company .

In the second week my team composed of Jonathan, Julie and Lyna has created a fictional company called the food truck. The goal was to offer organic meals such as burger, beef steak and others, on the last day we presented our project to the jury.
